

PC TRICKLESWITCH™

Desktop accessory for PC TrickleSaver

OVERVIEW

The product is a desktop accessory product for a PC TrickleSaver and provides manual switching control of PC accessory devices.

Whilst a PC TrickleSaver ensures that PC accessories are switched Off when the PC is Off, often a User does not require the PC accessories to be On whilst the PC is being used. The product allows a User to manually switch PC accessory devices On/Off and to supply power to devices as and when required thus significantly reducing the amount of vampire power consumed when a PC is On.

The product connects to a PC via a standard USB connector and a PC TrickleSaver plugs into a USB connector on the Product.

The product is easy to install and provides Users with increased ability to reduce wasteful vampire energy consumption.

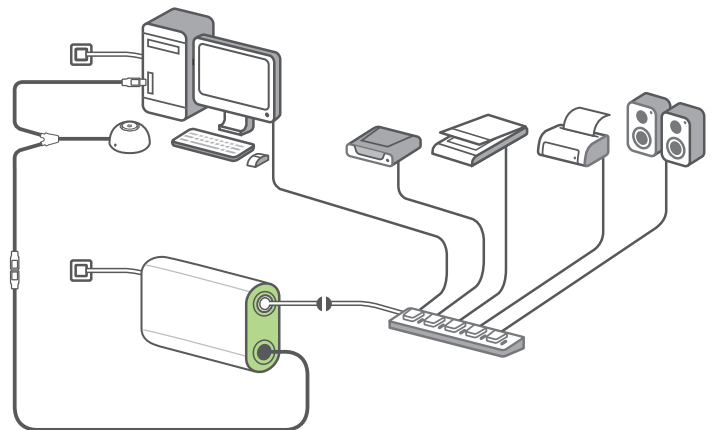

KEY FEATURES

- Accessory for a PC TrickleSaver.
- Installs in minutes.
- No configuration required.
- Works with PC + Mac notebooks + desktops.
- Suitable for home and office use.
