

## TV TRICKLESAVER™

Reduce vampire power consumption of TV accessories

### OVERVIEW

The product reduces the amount of vampire energy consumed by TV accessories. The product has inbuilt current sensing circuitry to sense when a TV is On or Off .

When the TV is On the product will switch On all accessories. Conversely when the TV is Off, the product will switch Off all accessories. The product is easy to install and provides simple automation to reduce wasteful standby energy consumption. The product is suitable for residential and workplace applications.

The product can be connected directly to equipment or connected to a standard electrical powerstrip with a number of connected devices.

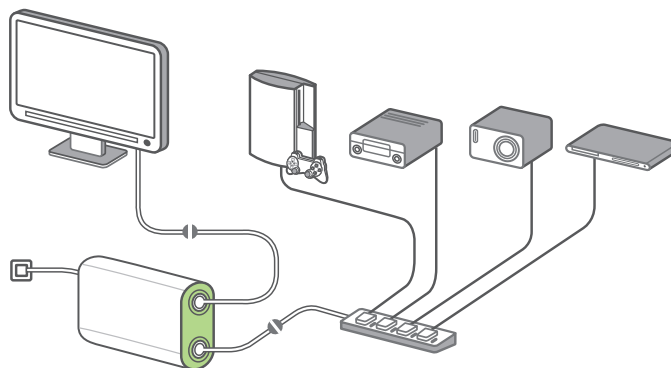

### KEY FEATURES

- In-built relay for switching off devices that consume standby current.
- Adjustable sensitivity for sensing TV status.
- Rear mounting holes for wall, under desk mounting.

### PRODUCT WARRANTY

The product is supplied with a 1 year product warranty against defective manufacturing and components.
